Sportcount **CHRONO 100 LAP** **COUNTER AND TIMER**

Once in a while, a product comes along and you wonder how you ever lived without it. OK, maybe it's not quite up there with the wheel and the toasted sandwich maker, but the Chrono 100 lap counter/timer from Sportcount is pretty amazing. A tiny watch that fastens securely around your index finger, the little unit is unobtrusive, but packs a punch. With just one push, the single button records lap times (and

lap number, for those who find it hard to keep count) and overall session time. At the end of your session, it will tell you average lap time, fastest and slowest lap times and your time for every single lap. Absolutely ideal for swimming, it's also a great device for running and biking. It's very reasonably priced and so tiny you'll hardly notice it in your kitbag. In fact, it's so good that we wish we could give it 11 out of 10.

Triathlon Verdict

An outstanding, dinky little gadget that makes assessing your performance a doddle
